WORLDGATE COMMUNICATIONS, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollar Amounts are in Thousands, Except for per Share and Share Data)  
(Unaudited)

1. Basis of Presentation.

The unaudited financial statements of WorldGate Communications, Inc. ("WorldGate" or the "Company") for the three and nine months ended September 30, 2005 and September 30, 2004 presented herein have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission for quarterly reports on Form 10-Q. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. These financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2004 and the notes thereto included in the Company's Annual Report on Form 10-K.

The financial information in this Report reflects, in the opinion of management, all adjustments of a normal recurring nature necessary to present fairly the results for the interim period. Quarterly operating results are not necessarily indicative of the results that may be expected for the year ending December 31, 2005.

2. Liquidity and Going Concern Considerations.

As of September 30, 2005 the Company had cash and cash equivalents of \$21,891. The operating cash usage from continuing operations for the three and nine months ended September 30, 2005 was \$2,488 and \$8,410, respectively. The funds we received as a result of private placements of our securities on December 1, 2003, December 4, 2003, January 21, 2004, April 22, 2004, June 23, 2004, December 15, 2004, August 5, 2005 and August 11, 2005, have permitted us to fund the development of our new business.

In December 2003 and January 2004, WorldGate received proceeds from investments aggregating \$3,100 by certain institutional investors. These investors purchased an aggregate of 3,000,000 shares of newly issued common stock. The investors also received a right, for a limited period of time, to purchase additional shares of up to 20% of the common stock purchased by the investors in their investment, at the same price as their investment, and five-year warrants to purchase up to 30% of the common stock purchased by the investors in their investment, at an exercise price equal to a twenty-five percent premium to their purchase price for the investment. The purchase price for the 2,000,000 shares purchased in the December 2003 transactions were \$0.80 per share, with the warrants having a \$1.00 per share exercise price. The purchase price for the 1,000,000 shares purchased in the January 2004 transaction was \$1.50 per share, with the warrants having a \$1.875 per share exercise price. All additional investment rights associated with the December 2003 transaction were exercised during January and February of 2004, resulting in an incremental investment of \$320. All additional investment rights associated with the January 2004 transaction were exercised in May 2004, resulting in an incremental investment of \$300. A portion of the warrants and additional investment right warrants associated with the December 2003 and January 2004 transactions were exercised in December 2004 and January 2005, resulting in an incremental investment of \$925.

In December 2003, WorldGate reached agreement with Mototech, Inc. (not an affiliate of Motorola) for the purchase of 625,000 shares of newly issued common stock at \$0.80 per share, in return for future design and engineering services by Mototech. WorldGate had previously contracted with Mototech to assist the Company with the design and volume manufacture of WorldGate's Ojo personal video phone. The purchase price for these shares has been fully paid as of December 31, 2004 by an equivalent reduction in the development and initial procurement payments that would otherwise be due to Mototech. The value of this transaction was \$600 (based on the closing stock price of \$0.96 on the date of the transaction) of which \$200 was recorded as an expense for the year ended December 31, 2003 and \$400 was expensed for the year ended December 31, 2004. Mototech is an affiliate of Accton Technology Group. Mototech currently manufactures and distributes a full range of high performance high speed data and computer networking products, including cable set top boxes, home gateways, wireless LANs, hubs, switches, routers, and other related products. In addition, in April 2004, Mototech invested \$1,000 to purchase 666,666 shares of newly issued common stock at \$1.50 per share.

In June 2004, WorldGate completed a private placement of 7,550 shares of Preferred Stock at a stated value of \$1,000 per share. The Preferred Stock has attached warrants and conversion options. Specifically, the holders of the Preferred Stock may convert their shares into our common

stock at a conversion price of \$2.35 per share. In addition, the Company may force conversion of the Preferred Stock into common stock if the Company achieves certain price targets for its common stock and satisfaction of certain other conditions. In either event the conversion price is subject to adjustment in the event the Company enters into another transaction which is dilutive to the subject transaction. As part of this transaction, the Company has also issued five-year warrants to purchase 1,606,383 shares of the Company's common stock, one-half of the warrants at an exercise price of \$2.69 per share and the remaining half at an exercise price of \$3.14 per share. The investors also received an additional investment right, for a limited period of time, to purchase 1,606,383 additional shares of common stock shares at \$3.14 a share. The preferred stock has a dividend rate of 5% per annum, payable quarterly, either by cash or through the issuance of common stock at the Company's option. The Preferred Stock has a staged maturity over three years with one-third of the preferred stock to be redeemed after 18 months, one-third after 24 months and one-third after 36 months, and may be redeemed at maturity in cash or, subject to certain conditions, through the issuance of common stock, at the Company's option (with stock payments being made at the then current market price). Of the 7,550 preferred shares issued under this private placement, all but 1,000 shares have been redeemed as of September 30, 2005. In December 2004 and January 2005, 1,606,383 additional investment rights were exercised, resulting in an incremental investment of \$5,044.

In December 2004, WorldGate completed a private placement of 208,333 shares of our common stock to K.Y. Chou, President and General Manager of Mototech, at a sales price of \$2.40 per share, which resulted in additional gross proceeds to the Company of \$500. In connection with this placement the Company granted warrants to Mr. Chou to purchase up to 62,500 shares of our common stock at an exercise price of \$2.88 per share.

In August 2005, the Company completed a private placement of \$17,500 of its common stock and warrants with several institutional investors. The Company issued 4,666,664 shares of its common stock at \$3.75 per share to the participating investors. The Company also issued five-year warrants to purchase a total of 1,633,333 shares of its common stock, with an exercise price of \$5.00 per share. The investors also received an additional investment right, for a period of 60 days from the time the shares become registered, to purchase 1,554,000 additional shares of common stock at \$4.12 per share. The accounting for these warrants and investment rights is established by analogy to APB No. 14 "*Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants*," which addresses detachable stock purchase warrants issued in conjunction with convertible debt and prescribes that such warrants be accounted for as additional paid in capital measured at fair value.

The Company had \$5,155 of liabilities and its assets are not pledged as collateral as of September 30, 2005. These liabilities include \$1,918 of dividends, detachable warrants and conversion options related to the Company's private placement of Preferred Stock.

Our Company has suffered recurring losses from operations and had a net accumulated deficiency of \$218,000 as of December 31, 2004, and these issues raise substantial doubt about our Company's ability to continue as a going concern. Our short term cash requirements and obligations include inventory, accounts payable and capital expenditures from continuing operations, operating expenses, and the redemption of stock, of which \$333 is required to be redeemed in December 2005 and \$333 in June 2006, although these redemptions can be made in common stock if certain conditions are met. We expect, based on our internal forecasts and assumptions relating to our operations (including among others, assumptions regarding our short term cash requirements and our projected revenue growth) that we have sufficient cash on hand to meet our obligations for at least the next twelve months.

Our ability to generate cash is dependant on the sale of our Ojo product and on obtaining cash through capital markets. We began generating revenue from commercial shipment of our Ojo product in April 2005 and we expect revenues to increase as the product continues to roll out to the marketplace. This increased level of sales activity is projected to have a positive impact on our cash flows from operations, which will support our ability to meet our obligations beyond the next twelve months. Given that our video phone business involves the development of a brand new product line with no market penetration, in an undeveloped market sector, no assurances can be given that sufficient sales, if any, will materialize.

Additionally, as needed, we plan to generate cash upon the sale of our Ojo product and on obtaining cash through capital markets for funding. No assurances can be given that, if pursued, additional financing transactions can be consummated. We continue to evaluate possibilities to obtain additional financing through public or private equity or debt offerings, bank debt financing, asset securitizations, or from other sources, should we need to obtain such financing. Such additional financing would be subject to the risk of availability, may be dilutive to our shareholders, or could impose restrictions on operating activities. There can be no assurance that this additional financing will be available on terms acceptable to us, if at all.

We, however, remain hopeful that sufficient sales will materialize and/or that sufficient funding can be developed through ongoing operations or additional financings to continue our operations beyond the next twelve months.

Our long term cash requirement obligations are primarily comprised of the items noted above. We have no long term debt and our contractual cash requirements and obligations existing beyond the next twelve months are comprised solely of operating lease commitments and redemption of preferred stock, which are not considered material. We have limited capacity to further reduce our workforce and scale back on capital and operational expenditures to decrease our cash usage.

### 3. Recent Accounting Pronouncement.

In November 2004, the FASB issued SFAS no. 151 "Inventory Costs" which amends the guidance in ARB No. 43, Chapter 4 "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). Paragraph 5 of ARB 43, Chapter 4, previously stated that under some circumstances, items such as idle facility expense, excessive spoilage, double freight and rehandling costs may be so abnormal as to require treatment as current period charges." SFAS No. 151 requires that those items be recognized as current-period charges regardless of whether they meet the criterion of "so abnormal." In addition, SFAS No. 151 requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. SFAS No. 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. Earlier application is permitted for inventory costs incurred during fiscal years beginning after the date SFAS No. 151 was issued. SFAS No. 151 is to be applied prospectively. The Company does not expect the adoption of SFAS No. 151 to have a material effect on its consolidated financial statements.

In December 2004, the FASB issued SFAS No. 153 "Exchanges of Nonmonetary Assets" which amends APB Opinion No. 29, "Accounting for Nonmonetary Transactions." APB No. 29 is based on the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged. The guidance in that Opinion, however, included certain exceptions to that principle. SFAS No. 153 amends APB No. 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS No. 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. Earlier application is permitted for nonmonetary asset exchanges occurring in fiscal periods beginning after the date SFAS No. 153 was issued. SFAS No. 153 is to be applied prospectively. The Company does not expect the adoption of SFAS No. 153 to have a material effect on its consolidated financial statements.

In December 2004, the FASB issued SFAS No. 123 (R), "Share-Based Payment" that focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. This statement replaces SFAS No. 123, "Accounting for Stock-Based Compensation", and supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees." Beginning with our annual periods that begin after June 15, 2005, we will be required to expense the fair value of employee stock options and similar awards. As a public company, we are allowed to select from two alternative transition methods, each having different reporting implications.

Subsequently, in April 2005, the SEC issued Release 2005-57, which allows companies to implement Statement No. 123 (R) at the beginning of their next fiscal year, instead of the next reporting period that begins after June 30, 2005 as disclosed in the original statement No. 123 (R) release in December 2004. We are currently evaluating the impact of this standard and its transitional alternatives.

In March 2005, the Financial Accounting Standards Board (FASB) issued Interpretation No. 47 (FIN 47) to clarify the guidance included in SFAS No. 143, "Accounting for Asset Retirement Obligations". FIN 47 requires companies to recognize a liability for the fair value of a legal obligation to perform asset retirement activities that are conditional on a future event if the amount can be reasonably estimated. If amounts cannot be reasonably estimated, certain disclosures will be required about the unrecognized asset retirement obligations. The interpretation is required to be adopted in the first quarter of 2006. We are currently evaluating the interpretation to determine the effect on our financial statements and related disclosures.

In May 2005, SFAS No. 154, "Accounting Changes and Error Corrections – replacement of APB Opinion No. 20 and FASB Statement No. 3," (SFAS No. 154) was issued. SFAS No. 154 changes the accounting for and reporting of a change in accounting principle by requiring retrospective application to prior periods' financial statements of changes in accounting principle unless impracticable. SFAS No. 154 is effective for accounting changes made in fiscal years beginning after December 15, 2005. The Company does not expect the adoption of SFAS No. 154 to have a material impact on its results of operations, financial position or cash flows.

#### 4. Inventories.

Inventories as of September 30, 2005 and December 31, 2004 are summarized as follows:

	September 30, 2005	December 31, 2004
Raw material (from discontinued operations)	\$ 0	\$ 1,622
Finished goods (from continuing operations)	255	46
<b>Total Inventory</b>	<b>255</b>	<b>1,668</b>
Inventory Reserve	0	(1,622)
<b>Inventory, net</b>	<b>\$ 255</b>	<b>\$ 46</b>

#### 5. Accounting for Preferred Shares and Derivative Shares

In June 2004, WorldGate completed a private placement of Preferred Stock. The Preferred Stock has a dividend rate of 5% per annum, payable quarterly, either by cash or through the issuance of common stock at the Company's option. The Preferred Stock has a staged maturity over three years with one-third of the Preferred Stock to be redeemed after 18 months, one-third after 24 months and one-third after 36 months, and may be redeemed at maturity in cash or, at the Company's option, subject to certain conditions that may not be solely under the control of the Company, through the issuance of the number of shares of common stock determined by dividing the liquidation preference of the preferred shares by the then current market price. If the effectiveness of the registration statement lapses, the Company ceases to be listed on certain specified exchanges and trading in the Company's stock is suspended or a change in control occurs with respect to the Company, the Company may be required to settle redemption of the preferred stock with cash instead of its common shares. Furthermore, since the market price of the Company's common stock cannot be predicted, the actual number of shares of the Company's common stock that will be required if a redemption is made through the issuance of common stock, can also not be predicted. Similarly the amount of the cash penalties may not be determinable until such time as the event triggering the cash payment is cured or removed.

The preferred stock has embedded conversion options. Specifically, the holders of the Preferred Stock may convert their shares into the Company's common stock at a conversion price of \$2.35 per share. In addition, the Company may force conversion of the Preferred Stock into common stock if the Company achieves certain price targets for its common stock and satisfaction of certain other conditions, such as the existence of an effective registration statement. In either event the conversion price is subject to adjustment if, at any time after the date the preferred shares were issued, the Company issues or sells, or is deemed to have issued or sold, any shares of the Company's common stock for per share consideration less than the conversion price of the preferred shares on the date of such issuance or sale. Accordingly, the number of common shares issuable upon the conversion of the preferred shares cannot be predicted. Furthermore, net-cash settlement may be required in the event of conversion default under certain circumstances that may not be solely under the control of the Company. If the effectiveness of the registration statement lapses, the Company ceases to be listed on certain specified exchanges and trading in the Company's stock is suspended or a change in control occurs with respect to the

Company, the Company may be required to settle a conversion of the preferred stock with cash instead of its common shares.

Also as part of the private placement the Company issued five-year warrants to purchase up to 803,190 shares of our common stock at an exercise price of \$2.69 per share and five-year warrants to purchase up to 803,190 shares of our common stock at an exercise price of \$3.14 per share. The investors also received an additional investment right, for a limited period of time, to purchase 1,606,383 additional shares of common stock shares at \$3.14 a share. This exercise price of the warrants is subject to adjustment if, at any time after the date the warrants were issued, the Company issues or sells, or is deemed to have issued or sold, any shares of the Company's common stock for per share consideration less than the exercise price of the warrants on the date of such issuance or sale. Accordingly, the number of common shares that will be issued upon the exercise of the warrants cannot be predicted. As of September 30, 2005, 125,000 warrants exercisable at \$2.69 had been exercised and 51,915 warrants exercisable at \$3.14 had been exercised. All of the additional investment rights had been exercised as of September 30, 2005.

Of the 7,550 preferred shares issued under this private placement, 1,625 shares were redeemed in the quarter ended September 30, 2005 and all but 1,000 shares have been redeemed as of September 30, 2005.

With respect to the Company's accounting for the Preferred Stock, EITF Topic D-98, paragraph 4, states that Rule 5-02.28 of Regulation S-X requires securities with redemption features that are not solely within the control of the issuer to be recorded outside of permanent equity. As described above, the terms of the Preferred Stock include certain redemption features that may be triggered by events that are not solely within the control of the Company, such as a potential failure in the Company's ability to maintain an effective registration statement. Furthermore, the actual number of shares of common stock required to satisfy redemption is based upon the market value of the common stock at the time of the redemption, which cannot be predicted. Accordingly, the Company has classified the Preferred Stock as temporary equity and the value ascribed to the redeemable preferred stock upon initial issuance, i.e. at June 23, 2004, was the amount received in the transaction minus the fair value ascribed to the conversion options and warrants. The initial value of the redeemable preferred stock is accreted up to the redemption value (the amount received in the transaction) over the future relevant periods using the interest method. The value of the redeemable preferred stock at September 30, 2005 was \$702.

The terms of the Preferred Stock include certain conversion options that represent derivative financial instruments under paragraph 12 of SFAS No. 133 and thus were separated from the Preferred Stock and valued using the Black-Scholes option pricing model. The conversion options include certain provisions that could result in a variable number of shares to be issued upon conversion, adjustment to the strike price at which conversion shares will be determined, or the requirement for the Company to settle the conversion options in cash. EITF 00-19, "Accounting for Derivative Instruments Indexed to, and Potentially Settled in, a Company's Own Stock," state that if the conversion options require net cash settlement in the event of circumstances that are not solely within the Company's control they should be classified as a liability measured at fair value on the balance sheet.

The terms of the five-year warrants include cash penalty provisions in the event that the Company fails to meet its obligations to deliver registered shares to the warrant holder upon exercise and an anti-dilution provision that could result in a variable number of shares to be issued upon warrant exercise. Additionally, the terms and conditions of the warrants provide for net settlement via cashless exercise whereby the shares delivered to the warrant holder would be readily convertible to cash. In accordance with EITF 00-19 and given the terms and conditions of the warrants as outlined above, the Company has classified the warrants as a liability on its balance sheet measured at fair value using the Black-Scholes option pricing model.

The Company accounts for both the conversion options and warrants using the fair value method at the end of each quarter, with the resultant gain or loss recognition recorded against earnings. Both the warrants and conversion options are valued using the Black-Scholes valuation model. Actual period close common stock prices, applicable volatility rates, and the period close risk-free interest rate for the instrument's expected remaining life (continuously compounded), are the key assumptions used in the valuation calculation. The WorldGate share price changed from \$3.24 per share as of June 30, 2005 to \$2.52 per share at September 30, 2005, making the warrants and preferred stock conversion elements less valuable, and therefore less costly, relative to their strike price. The result was a \$1,759 non cash gain for the quarter ended September 30, 2005.

#### 6. Warranty Reserve.

We provide a warranty covering defects arising from the sales of our video phone product. This warranty is limited to a specific time period. The Company, as of September 30, 2005, established an initial reserve of \$336 that is based on a percentage of product sales. As of September 30, 2005, the Company has not incurred any material warranty costs related to our product. Warranty costs are charged to cost of revenues when they are probable and reasonably estimable. While we believe our estimate at September 30, 2005 is reasonable and

adequate, it is subject to change based on our future sales and experience, which may require an increase or decrease in our reserve.

## 7. Stock-Based Compensation (Restated).

The Company accounts for stock-based compensation in accordance with Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation—Transition and Disclosure."

The Company applies Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" and related interpretations in accounting for its plans, and accordingly, no compensation cost has been recognized for the Company's fixed stock based compensation. Had compensation cost been determined consistent with SFAS No. 123, as amended by SFAS No. 148, the Company's net loss would have been increased to the following pro forma amounts:

	For the Three Month Period Ended September 30		For the Nine Month Period Ended September 30	
	2005	2004	2005	2004 (as restated)
Net (loss) income	(1,397)	(1,510)	831	(5,562)
Add: Stock-based employee compensation expense included in reported net (loss) income, net of related tax effects	0	0	0	0
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of tax of \$0	(215)	(544)	(615)	(1,627)
Pro forma net (loss) income	\$ (1,612)	\$ (2,054)	\$ 216	\$ (7,189)
Net (loss) income per share:				
Net (loss) income:				
Basic	\$ 0.04	\$ (0.05)	\$ 0.02	\$ (0.20)
Fully Diluted	\$ 0.04	\$ (0.05)	\$ 0.02	\$ (0.20)
Net (loss) income – pro forma:				
Basic	\$ 0.04	\$ (0.07)	\$ 0.01	\$ (0.26)
Fully Diluted	\$ 0.04	\$ (0.07)	\$ 0.01	\$ (0.26)

Such pro forma disclosures may not be representative of future compensation expense because options vest over several years and additional grants are made each year.

## 8. Commitments and Contingencies.

### Leases

In 1998 the Company entered into a leasing arrangement for a building with an entity formed by non-employee investors. The Company stopped paying rent on this lease in May 2003, and in lieu of rent payments the Company's landlord, 3190 T General, Inc. (an entity formed by non-employee investors in the Company), began drawing down the security deposit for the facility. Prior to stopping rent payments, the Company had commenced negotiations with its landlord for an amendment of its lease to reduce the space commitment and the rent payable. These negotiations were not successful, and in September 2003, the Company's landlord filed an action in the Court of Common Pleas, Bucks County, Pennsylvania to perfect its interest to take possession of the Company's facility, and to establish damages for past rent and expenses. Although a judgment was granted allowing the Company's landlord to regain possession of the facility, the Company remained in the facility and continued negotiations with its landlord. During 2004, the landlord deeded the facility to its mortgage holders and negotiations commenced with GMAC as representative for the mortgage holders. These negotiations were successful and in November 2004 the Company's lease was amended with an effective date of June 2004 to reduce the lease obligation in line with the Company's then current space requirements, and to bring the Company current with respect to all outstanding back rent. Subsequently, GMAC sold the building and we have negotiated a new lease with the new owner on

September 1, 2005. The current lease covers 42,500 square feet at an annual rate of \$11 per square foot, cancelable by either party with 8 months notice, with a termination by tenant also including six months termination fee.

In November 2003, the Company entered into a 60 month lease for office equipment. As of September 30, 2005 there remains a total of \$18 to be paid over the remaining period of the lease.

#### *Significant Agreements and Transactions*

Net revenues from continuing operations recognized from an investor were approximately \$2,265 and \$106, respectively, for the three months ended September 30, 2005 and 2004, and approximately \$3,841 and \$106, respectively, for the nine months ended September 30, 2005 and 2004. This investor accounted for approximately 99% of the revenues for the three and nine months ended September 30, 2005. This investor previously provided a cash advance against product shipments. The balance of this advance received from this investor was \$0 as of September 30, 2005. Accounts receivable from this investor were \$1,176 as of September 30, 2005 and \$0 at December 31, 2004. In April and September 2004, we issued to this investor warrants to purchase shares of our common stock, with the April warrants having an exercise price of \$1.4375 per share and the September warrants having an exercise price of \$1.75 per share. Included with General and Administrative expenses in September 2004 were \$606 of expenses relating to the valuation of these warrants. This valuation was determined by using the Black-Scholes fair value option model. The following assumptions were used: expected volatility of 65%; average risk-free interest rate of 3.43 percent; dividend yield of 0%; and an expected life of 5.0 years.

The Company has a current two year agreement with an investor to provide the Company with engineering and development support. As a result of this agreement, the Company has expensed approximately \$97 (included in continuing operations) and \$0 (included in discontinued operations), for the three months ended September 30, 2005 and September 30, 2004, respectively, and approximately \$255 (included in continuing operations) and \$0 (included in discontinued operations), for the nine months ended September 30, 2005 and 2004, respectively. Accounts payable to this investor amounted to \$1,097 and \$117 at September 30, 2005 and December 31, 2004, respectively. This agreement provided for contracted services, including hardware and software development, and the creation and development of tools to facilitate the Company's engineering efforts. This agreement does not provide for ongoing royalties, purchase provisions, or for any requirement to provide additional funding to the Company.

On April 28, 2004, we entered into a Development and Distribution Agreement with General Instrument Corporation d/b/a the Broadband Communication Sector of Motorola, Inc., or Motorola. In connection with the Development and Distribution Agreement with Motorola, we issued warrants to Motorola to purchase 600,000 shares of our common stock, 300,000 at an exercise price of \$1.4375 per share and 300,000 at an exercise price of \$1.75, and agreed to issue additional warrants to purchase up to an additional 1,650,000 shares of our common stock, upon the achievement of certain product and sales milestones, at an exercise price based upon the average closing sales price of our common stock during the 20 day period preceding the issuance of each warrant.

In June 2004, WorldGate completed a private placement of 7,550 shares of Preferred Stock at a stated value of \$1,000 per share. The Preferred Stock has attached warrants and conversion options. Specifically, the holders of the Preferred Stock may convert their shares into our common stock at a conversion price of \$2.35 per share. The private placement includes numerous provisions intended to protect these institutional investors including a cash payment penalty of 1.0% per month for unredeemed preferred shares once registration of the shares lapse and until the registration again becomes effective. A registration statement for these securities was originally filed containing fiscal 2003 financial statements, and an amendment to this registration statement which would include fiscal 2004 financial statements has not yet been filed.

In August 2005, the Company completed a private placement of \$17,500 of its common stock and warrants with several institutional investors. The Company issued 4,666,664 shares of its common stock at \$3.75 per share to the participating investors. The Company also issued five-year warrants to purchase a total of 1,633,333 shares of its common stock, with an exercise price of \$5.00 per share. The private placement includes numerous provisions intended to protect these institutional investors including a cash payment penalty of 1.5% per month for the period above 120 days from the effective date of the Agreement that the shares in the transaction fail to be registered. As of September 30, 2005, no such penalty had been incurred. On December 1, 2005 the shares under this private placement had not been registered and until such time as the shares become registered the Company is subject to the penalty provision under this private placement.

#### 9. Net (Loss) Income per Share.

Basic and diluted net (loss) income per common share is computed by dividing the net (loss) income available to common stockholders for the period by the weighted average number of shares of common stock outstanding during the period. The calculation of diluted net (loss) income per common share excludes potential common shares if the effect is antidilutive. Potential common shares comprised of shares of common stock issuable upon the exercise of stock options and warrants and the conversion of preferred stock. For the nine month periods ended September 30, 2005 and 2004, there would have been a potential additional 4,887,190 and 13,590,347, respectively, shares assumed to be converted, that would have a dilutive effect, if the Company had income from continuing operations, or if the options' exercise price was less than the average market price of the common shares.

#### 10. Revenue recognition

Revenue is recognized when persuasive evidence of an arrangement exists, the price is fixed or determinable, the collectibility is reasonably assured, and the delivery and acceptance of the equipment has occurred or services have been rendered. Management exercises judgment in evaluating these factors in light of the terms and conditions of its customer contracts and other existing facts and circumstances to determine appropriate revenue recognition. Due to our limited commercial sales history, our ability to evaluate the collectibility of customer accounts requires significant judgment. The Company evaluates its equipment customer, and service customers', accounts for collectibility at the date of sale and on an ongoing basis.

Presently the Company has only one customer for the purchase of its equipment and the agreement with this customer includes several elements relevant to revenue recognition including: (a) The customer has no general right to return the product. (b) The customer can earn warrants upon the purchase of significant video telephony units and the value of these warrants would result in a reduction of recognized revenue (the value of these warrants is routinely monitored by the Company and is currently deemed to be insignificant, however, should the value of these warrants become material an offset would be made against revenues). (c) Penalties are payable to the customer if certain excessive field failure rates are exceeded. (d) The Company and the customer share in the benefit achieved by product cost reductions. (e) Penalties are payable to the customer if the Company fails to deliver shipments on a timely basis. (f) The Company extends to the customer a limited product warranty for a term not to exceed three years (the Company maintains a warranty reserve based upon the percentage of product sales consistent with industry comparable failure rates and the warranty period provided by the agreement.)

Revenues are also offset with a reserve for any price refunds and consumer rebates consistent with the Emerging Task Force ("EITF") Issue 01-9, Accounting for Consideration Given by a vendor to a Customer.

As an incentive to promote delivery of the units, a special product launch discount was provided by the Company to our distributor as a quantity restricted reduction to the unit contract based price in effect. For the three and nine months ended September 30, 2005, this discount was \$831 and \$1,222, respectively. In addition, the Company has offered a forward pricing program to our distributor and a rebate program to consumers, as further incentives for the holiday season. These incentive programs begin in the fourth quarter of 2005 and will terminate during the first quarter of 2006. Consistent with the Emerging task Force ("EITF") Issue 01-9, Accounting for Consideration Given by a vendor to a Customer, the Company has offset the September 30, 2005 revenue by \$212 with a reserve for the total estimated liability for the forward pricing program. The liability associated with the rebate, \$91, will be recorded in the quarter ending December 31, 2005. The total of the "Product launch discount, rebate and refunds for the three and nine months ended September 30, 2005 were \$1,043 and \$1,434, respectively.

#### 11. Risks and uncertainties

Our primary line of business is the development of video phone products and technology. We are still in the process of launching our first product based on this technology and, although we have realized some revenues for the commercial sale of our product, the revenues to date have not been substantial. Given the early stage of our product and the lack of operating history in the video phone business, it is difficult to predict our future results.

We have entered into a six year distribution agreement with Motorola, Inc. for the marketing and distribution of our Ojo video phone. This agreement provides for Motorola to be WorldGate's exclusive distributor of its broadband video phone products and for WorldGate to be Motorola's exclusive supplier of its broadband video phone products. Although the agreement requires Motorola to provide for certain marketing and promotional activities for the Ojo video phone, there are no required sales quotas for the agreement to remain in effect, and Motorola controls the volume of the Company's products being distributed. Neither party can terminate the agreement except in cases of uncured breaches of the agreement or as a result of insolvency events suffered by the other party. After a period of 18 months following the commercial availability of the Ojo video phone the mutual exclusivity will terminate unless Motorola elects to continue the mutual exclusivity after having achieved certain minimum sales targets for the Ojo video phone. Motorola may, however, at its option, elect to terminate the exclusivity at any time. In the event mutual exclusivity terminates or is terminated, then for a period of twelve months thereafter, WorldGate will continue to be Motorola's exclusive supplier of broadband video phones but will be free to sell video phones to customers other than certain defined Motorola accounts. During this twelve month period, Motorola has a right of first refusal to accept and fill any orders for video phone products that WorldGate obtains from non-Motorola accounts, and is obligated to use good faith efforts to solicit and accept product orders from Motorola accounts in a commercially reasonable manner. During any period of exclusivity under this agreement we are reliant upon Motorola and its distribution partners, including, for example, wholesalers, retailers and service providers, to provide the worldwide sales and distribution of the Ojo video phone. If Motorola and its partners are not successful, or if their activities do not lead to significant sales of our product, our operating results will be adversely affected, our revenue could be significantly reduced and we could lose potential customers.

We also depend on relationships with third parties such as contract manufacturing companies, chip design companies and others who may be sole source providers of key components and services critical for the product we are developing in our video phone business. A formal relationship with Mototech, Inc. (not an affiliate of Motorola) has been established for the volume manufacture of Ojo. Mototech is currently the sole volume manufacturer of Ojo. Our agreement with Mototech allows either party to terminate the agreement with 90 days prior notice. If Mototech, Inc. or other providers of components and/or manufacturing services do not produce these components or provide their services on a timely basis, if the components or services do not meet our specifications and quality control standards, or if the components or services are otherwise flawed, we may have to delay product delivery, or recall or replace unacceptable products. In addition, such failures could damage our reputation and could adversely affect our operating results. As a result, we could lose potential customers and any revenues that we may have at that time may decline dramatically.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

### FORWARD-LOOKING AND CAUTIONARY STATEMENTS

We may from time to time make written or oral forward-looking statements, including those contained in the following Management's Discussion and Analysis of Financial Condition and Results of Operations. The words "estimate," "project," "believe," "intend," "expect," and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. In order to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, we are hereby identifying certain important factors that could cause our actual results, performance or achievement to differ materially from those that may be contained in or implied by any forward-looking statement made by or on our behalf. The factors, individually or in the aggregate, that could cause such forward-looking statements not to be realized include, without limitation, the following: (1) difficulty in developing and implementing marketing and business plans, (2) industry competition factors and other uncertainty that a market for our products will develop, (3) challenges associated with broadband service operators (including, uncertainty that they will offer our products, inability to predict the manner in which they will market and price our products and existence of potential conflicts of interests and contractual limitations impeding their ability to offer our products), (4) continued losses, (5) difficulty or inability to raise additional financing on terms acceptable to us, (6) departure of one or more key persons, (7) delisting of our Common Stock from the NASDAQ Small Cap Market, (8) changes in regulatory requirements, and (9) other risks identified in our filings with the Securities and Exchange Commission. We caution you that the foregoing list of important factors is not intended to be, and is not, exhaustive. We do not undertake to update any forward-looking statement that may be made from time to time by or on our behalf.

#### Results of Operations:

##### General.

Our ITV business has historically accounted for substantially all of our revenue. In the third quarter of 2003, we completed a sale of significant assets, including our ITV intellectual property rights and our membership interest in TV Gateway, LLC. This transaction marked a shift in our business away from the ITV business and toward a new video phone product and related business. Although we continued to support our remaining ITV business into the first quarter of 2004, the development of our video phone and product became a primary business focus.

Our video phone business has not produced significant revenues to date. The extent and timing of future revenues for our business depends on several factors, including the rate of market acceptance of our products and the degree of competition from similar products. We cannot predict to what extent our video phone product will produce revenues, or when, or if, we will reach profitability.

#### Critical Accounting Policies and Estimates.

The consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America. The preparation of these financial statements required management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The significant accounting policies of the Company are described in the notes to the consolidated financial statements included in the annual report on Form 10-K. Judgments and estimates of uncertainties are required in applying the Company's accounting policies in many areas. Following are some of the areas requiring significant judgments and estimates: revenue recognition, accounts receivable, inventories, cash flow and valuation assumptions in performing asset impairment tests of long-lived assets, value of redeemable preferred stock, related warrants and conversion options.

## Discontinued Operations

During the first quarter of 2004, we transitioned from the business of developing and selling interactive television, or ITV, technology, products and services for use in conjunction with cable TV broadband networks (the "ITV business") to the development of our video phone products as our primary business focus. During the three and nine months ended September 30, 2004, the Company had revenues from our discontinued ITV business operations of \$0 and \$82, respectively. Cost of revenues for the three and nine months ended September 30, 2004 was \$0 and \$43, respectively. Operating expenses from discontinued operations were \$0 and \$16, respectively, for the three and nine months ended September 30, 2004. For the three and nine months ended September 30, 2004, other income, net of other expenses, relating to our discontinued ITV business operations were \$7 and \$13, respectively. There were no revenues, cost of revenues, operating expenses, and other income and other expenses from discontinued operations during the three and nine months ended September 30, 2005.

The information in our quarter-to-quarter comparisons below represents only our results from continuing operations.

### Three and nine Months Ended September 30, 2005 and September 30, 2004 (Restated)

#### Revenues.

Revenues. Total gross revenues from continuing operations for the three and nine months ended September 30, 2005 were \$3,333 and \$5,300, respectively. Net revenues for the three and nine months ended September 30, 2005 were \$2,290 and \$3,866, respectively. These revenues represent deliveries of video phones for pre-market testing, for the initial launch of video phones for the consumer market and for filling the channel distribution pipelines prior to the holiday selling season. As an incentive to promote delivery of the units, a special product launch discount was provided by the Company to our distributor as a quantity restricted reduction to the unit contract based price in effect. For the three and nine months ended September 30, 2005, this discount was \$831 and \$1,222, respectively. In addition, the Company has offered a forward pricing program to our distributor and a rebate program to consumers, as further incentives for the holiday season. These incentive programs begin in the fourth quarter of 2005 and will terminate during the first quarter of 2006. Consistent with the Emerging task Force ("EITF") Issue 01-9, Accounting for Consideration Given by a vendor to a Customer, the Company has offset the September 30, 2005 revenue by \$212 with a reserve for the total estimated liability for the forward pricing program. The liability associated with the rebate, \$91, will be recorded in the quarter ending December 31, 2005. The total of the "Product launch discount, rebate and refunds for the three and nine months ended September 30, 2005 were \$1,043 and \$1,434, respectively.

#### Costs and Expenses.

Cost of Revenues. The cost of revenues from continuing operations, which consisted of product and delivery costs relating to the delivery of video phones, was \$2,450 and \$3,840, respectively, for the three and nine months ended September 30, 2005. In addition, included in cost of revenues for the three and nine months ended September 30, 2005, is an initial product warranty reserve of \$336 (refer to footnote 6 to the financial statements). There was no warranty reserve for the same periods in 2004. Costs of revenues from continuing operations during the three and nine months ended September 30, 2004 were \$50.

Engineering and Development. Engineering and development expenses primarily consist of compensation, and the cost of design, programming, testing, documentation and support of the Company's video phone product. Engineering and development costs were \$1,468 for the three months ended September 30, 2005, compared with \$1,038 for the three months ended September 30, 2004, and \$4,146 and \$2,637, respectively, for the nine months ended September 30, 2005 and 2004. This increase of \$430, or 41%, and \$1,509, or 57%, respectively, for the three and nine months ended September 30, 2005 over 2004, reflects the Company's increased concentration of its engineering staff, and related costs, for the further and continuing development of its video phone product.

Sales and Marketing. Sales and marketing expenses consist primarily of compensation, attendance at conferences and trade shows, travel costs, promotions and other marketing programs related to the marketing of the Company's video phone product. Sales and marketing costs were \$392 for the three months ended September 30, 2005, compared with \$324 for the three months ended September 30, 2004, and \$1,410 and \$924, respectively, for the nine months ended September 30, 2005 and 2004. This increase of \$68, or 21%, and \$486, or 53%, respectively, for the three and nine months ended September 30, 2005 over 2004, reflects the increased effort of staff, and related marketing, service and promotional expenditures associated with the launch and growth of the Company's video phone business.

General and Administrative (Restated). General and administrative expenses consist primarily of expenditures for administration, office and facility operations, finance and general management activities, including legal, accounting and professional fees. General and administrative expenses were \$1,248 for the three months ended September 30, 2005, compared with \$1,762 for the three months ended September 30, 2004, and \$2,982 and

\$3,805, respectively, for the nine months ended September 30, 2005 and 2004. This decrease of \$514, or 29%, and \$823, or 22%, respectively, for the three and nine months ended September 30, 2005 over 2004, is attributable to certain expenses incurred during the three and nine months ended September 30, 2004 that were not incurred during the three and nine months ended September 30, 2005. These expenses consisted of a non cash charge of \$606 reflecting a Black Scholes estimate of the value of the warrants issued to a related investor in September 2004, an expense for sales taxes of \$125 incurred in the first quarter of 2005, and a reduction in rent expense of \$186 and \$624, respectively, for the three and nine months ended September 30, 2005 compared to the three and nine months ended September 30, 2004. These decreases were partially offset by increased professional fees incurred of \$278 and \$516, respectively, for the three and nine months ended September 30, 2005 when compared to the same periods in 2004.

**Interest, Other Income and Interest Expense.** Interest, other income and interest expense consist of interest earned on cash and cash equivalents, and interest expense on short-term debt. Interest and other income increased from \$37 for the three months ended September 30, 2004 to \$292 for the three months ended September 30, 2005, and increased from \$56 for the nine months ended September 30, 2004 to \$466 for the nine months ended September 30, 2005, primarily due to additional interest income earned on a higher level of invested funds and an insurance refund settlement of \$36. During the three months ended September 30, 2005, the Company earned interest on average cash balances of approximately \$12,890 and incurred interest expense related to its insurance financing. In comparison, during the three months ended September 30, 2004 the Company earned interest on average cash balances of approximately \$6,693 and incurred interest expense related to its insurance financing. For the nine months ended September 30, 2005, the Company earned interest on average cash balances of approximately \$12,111 compared to \$6,049 for the nine months ended September 30, 2004.

**Income Taxes.** The Company has incurred net operating losses since inception and accordingly had no income taxes and has not recorded any income tax benefit for those losses.

#### Liquidity and Capital Resources.

As of September 30, 2005, our primary source of liquidity consisted of cash and cash equivalents that are highly liquid, are of high quality investment grade and have original maturities of less than 90 days.

At September 30, 2005, we had cash and cash equivalents of \$21,891 (and no short-term investments) as compared to cash and equivalents of \$11,840 (and no short-term investments) at December 31, 2004. Net cash used in continuing operations was \$2,488 for the three months ended September 30, 2005, as compared to \$1,867 used for the same period in 2004. The net cash used in continuing operations was \$8,410 for the nine months ended September 30, 2005 as compared to \$5,308 used for the same period in 2004. This increase in net cash used for continuing operations was primarily attributable to the Company's increase in expenditures related to the video phone business. The Company recorded bad debt expense in the amount of \$0 and \$16, respectively, from discontinued operations during the three and nine months ended September 30, 2004 to reflect its current assessment of the collectability of certain receivables.

Cash provided by financing activities from continuing operations during the three months ended September 30, 2005, totaled \$16,966 compared to \$12 provided during the same period in 2004. Cash provided by financing activities from continuing operations during the nine months ended September 30, 2005 was \$18,889 as compared to \$10,378 provided during the same period in 2004. Capital expenditures were \$107 and \$167 for the three months ended September 30, 2005 and 2004, respectively. For the nine months ended September 30, 2005 and 2004 capital expenditures were \$428 and \$197, respectively.

#### Operations and Liquidity.

To date, the Company has funded operations primarily through private sales of equity securities and through an initial public offering of common stock in April 1999. As of September 30, 2005 the Company had cash, and cash equivalents of \$21,891. The operating cash usage from continuing operations for the three months ended September 30, 2005 and 2004 was \$2,488 and \$1,867, respectively. Operating cash usage from continuing operations for the nine months ended September 30, 2005 and 2004 was \$8,410 and \$5,308, respectively. As of September 30, 2005 we have no outstanding debt and our assets are not pledged as collateral.

The Company has funded operations through the private placement of our common stock in January 2004, which provided proceeds of \$1,500, the private placement of our common stock in April 2004 providing proceeds of \$1,000, the June 2004 private placement of our redeemable preferred stock providing proceeds of \$7,550, the private placement of common stock in December 2004 providing \$500, the exercise of additional investment rights and warrants providing \$6,800 in January, February, May and December 2004 and January, February, and April 2005, the exercise by employees and former employees of options throughout 2004 and January through September 2005 providing aggregate proceeds of \$1,171, and the August 2005 private placement of common stock, together with additional rights and warrants, providing \$17,500. We do however have an obligation to pay dividends on, as well as to redeem, our outstanding Preferred Stock upon maturity, or at the earlier option of a holder of these securities. Under certain limited circumstances we may be forced to make such payments and redemptions with cash instead of shares of our common stock. In such event our ability to fund continuing operations would be negatively impacted.

The report of the independent registered public accounting firm for the year ended December 31, 2004 included an explanatory paragraph stating that the Company had suffered recurring losses from operations and had a net accumulated deficiency of \$218,000, and that these issues raised substantial doubt about the Company's ability to continue as a going concern. Our short term cash requirements and obligations include inventory, accounts payable and capital expenditures from continuing operations, operating expenses, and the redemption of preferred stock, of which \$333 is required to be redeemed in December 2005 and \$333 in June 2006, although these redemptions can be made in common stock if certain conditions are met. We expect, based on our internal forecasts and assumptions relating to our operations (including among others, assumptions regarding our short term cash requirements and our projected revenue growth) that we have sufficient cash on hand to meet our obligations for at least the next twelve months.

Our ability to generate cash is dependant upon the sale of our Ojo product and on obtaining cash through capital markets. We began generating revenue from commercial shipment of our Ojo product in April, 2005 and we expect revenues to increase as the product continues to roll out to the marketplace. This increased level of sales activity is projected to have a positive impact on our cash flows from operations, which will support our ability to meet our obligations beyond the next twelve months. Given that our video phone business involves the development of a new product line with no market penetration, in an underdeveloped market sector, no assurances can be given that sufficient sales, if any, will materialize.

Additionally, as needed, we plan to generate cash by turning to the capital markets for funding. No assurances can be given that, if pursued, additional financing transactions can be consummated. We continue to evaluate possibilities to obtain additional financing through public or private equity or debt offerings, bank debt financing, asset securitizations, or from other sources, should we need to obtain such financing. Such additional financing would be subject to the risk of availability, may be dilutive to our shareholders, or could impose restrictions on operating activities. There can be no assurance that this additional financing will be available on terms acceptable to us, if at all.

We do, however, remain hopeful that sufficient sales will materialize and/or that sufficient funding can be developed through ongoing operations or additional financings to continue our operations beyond the next twelve months.

Our long term cash requirement obligations are primarily comprised of the items noted above. We have no long term debt and our contractual cash requirements and obligations existing beyond the next twelve months are comprised solely of operating lease commitments and redemption of preferred stock, which are not considered material. We have limited capacity to further reduce our workforce and scale back on capital and operational expenditures to decrease our cash usage.

In December 2003, WorldGate reached an agreement with Mototech, Inc. (not an affiliate of Motorola) for the purchase of 625,000 shares of newly issued common stock at \$0.80 per share, in return for future design and engineering services by Mototech. WorldGate had previously contracted with Mototech to assist the Company with the design and volume manufacture of WorldGate's Ojo personal video phone. The purchase price for these shares has been fully paid as of December 31, 2004 by an equivalent reduction in the development and initial procurement payments that would otherwise be due to Mototech. The value of this transaction was \$600 (based on the closing stock price of \$0.96 on the date of the transaction) of which \$200 was recorded as an expense for the year ended December 31, 2003 and \$400 was expensed for the year ended December 31, 2004. Mototech is an affiliate of Accton Technology Group, a group of Taiwanese manufacturers that we believe are well-known in the electronics industry. Mototech currently manufactures and distributes a full range of high performance high speed data and computer networking products, including cable set top boxes, home gateways, wireless LANs, hubs, switches, routers, and other related

products. In addition, in April 2004, Mototech invested \$1,000 to purchase 666,666 shares of newly issued common stock at \$1.50 per share.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

**Interest Rate Risk.** Our exposure to market risk related to changes in interest rates relates primarily to our investment portfolio. We invest in instruments that meet high credit quality standards, and we limit the amount of credit exposure with respect to any one issue, issuer and type of investment.

As of September 30, 2005, the Company's cash and cash equivalents were \$21,891, having an original maturity of less than 90 days, and it had no short-term investments. Due to the average maturity and conservative nature of our investment portfolio, management believes a sudden change in interest rates would not have a material effect on the value of the portfolio. Management estimates that had the average yield of our investments decreased by 100 basis points, our interest income for the nine months ended September 30, 2005 would have decreased by approximately \$87. This estimate assumes that the decrease occurred on the first day of 2005 and reduced the yield of each investment instrument by 100 basis points. The impact on our future interest income of future changes in investment yields will depend largely on our total investments.

**Foreign Currency Exchange Risk.** Although we transact business in various foreign countries, the principal portion of our business is in the United States and substantially all of our revenues and costs to date have been denominated in U.S. dollars. Although our agreement with Mototech (not an affiliate of Motorola), our contract manufacturer in Taiwan, is denominated in U.S. dollars, their material acquisition costs are subject to exchange rate changes that could impact our product costs.

### ITEM 4. CONTROLS AND PROCEDURES.

As of the end of the period covered by this Form 10-Q, our management, with the participation of our chief executive officer and chief financial officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")).

Based on that evaluation, our chief executive officer and chief financial officer determined that we have a material weakness (as defined under the standards established by the American Institute of Certified Public Accountants) that exists with respect to our reporting of complex transactions. As a result of this material weakness, on November 17, 2004 we restated our financial statements in our annual and quarterly reports from our Form 10-Q for the quarter ended March 31, 2004 through this report.

To address this material weakness, we have engaged outside experts to provide counsel and guidance in areas where we cannot economically maintain the required expertise internally (e.g., with the appropriate classifications and treatments of complex and non-routine transactions).

As a result of the material weakness identified with respect to our reporting of complex transactions, the chief executive officer and chief financial officer concluded that our disclosure controls and procedures are not designed and effective in ensuring that the information required to be disclosed by our company in the reports that we file and submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms. Except as identified above, there have been no changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2005, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

(Dollar Amounts are in Thousands, Except per Share Amounts)

### ITEM 1. LEGAL PROCEEDINGS.

None

### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

On August 3, 2005, the Company completed a private placement of \$17,500 of its common stock and warrants with several institutional investors. The Company issued 4,666,664 shares of its common stock at \$3.75 per share to the participating investors. The Company also issued five-year warrants to purchase a total of 1,633,333 shares of its common stock, with an exercise price of \$5.00 per share. The investors also received an additional investment right, for a limited period of time, to purchase 1,554,000 additional shares of common stock at \$4.12 per share.

### ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

### ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.

(a) Exhibits.

The following is a list of exhibits filed as part of this report on Form 10-Q. Where so indicated by footnote, exhibits that were previously filed are incorporated by reference. For exhibits incorporated by reference, the location of the exhibit in the previous filing is indicated parenthetically except in those situations where the exhibit number was the same as set forth below.

Exhibit	Description
3.1	Amended and Restated Certificate of Incorporation (3)
3.2	Amended and Restated Bylaws (1)
3.3	Certificate of Amendment to Certificate of Incorporation, dated October 18, 2004 (3)
3.4	Certificate of Designations, Preferences and Rights of the Series A Convertible Preferred Stock of the Company dated June 23, 2004 (2)
31.1	Certification of Chief Executive Officer Pursuant to Rule 13a-14(a)*
31.2	Certification of Chief Financial Officer Pursuant to Rule 13a-14(a)*
32.1	Certification of Chief Executive Officer Pursuant to 18 U.S.C. Section 1350, as adopted by Section 906 of the Sarbanes-Oxley Act of 2002*
32.2	Certification of Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as adopted by Section 906 of the Sarbanes-Oxley Act of 2002*

---

\* Filed herewith

(1) Incorporated by reference to the exhibits to our Form 10-Q Report for the quarter ended March 31, 1999.

(2) Incorporated by reference to the exhibits to our Form 8-K Current Report filed on June 25, 2004 (Exhibit 3.1).

(3) Incorporated by reference to the exhibits to our Form 10-Q Report for the quarter ended September 30, 2004, as filed on November 17, 2004.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
